

Hotspots of colorectal cancer mortality (US mainland 2018–2022)

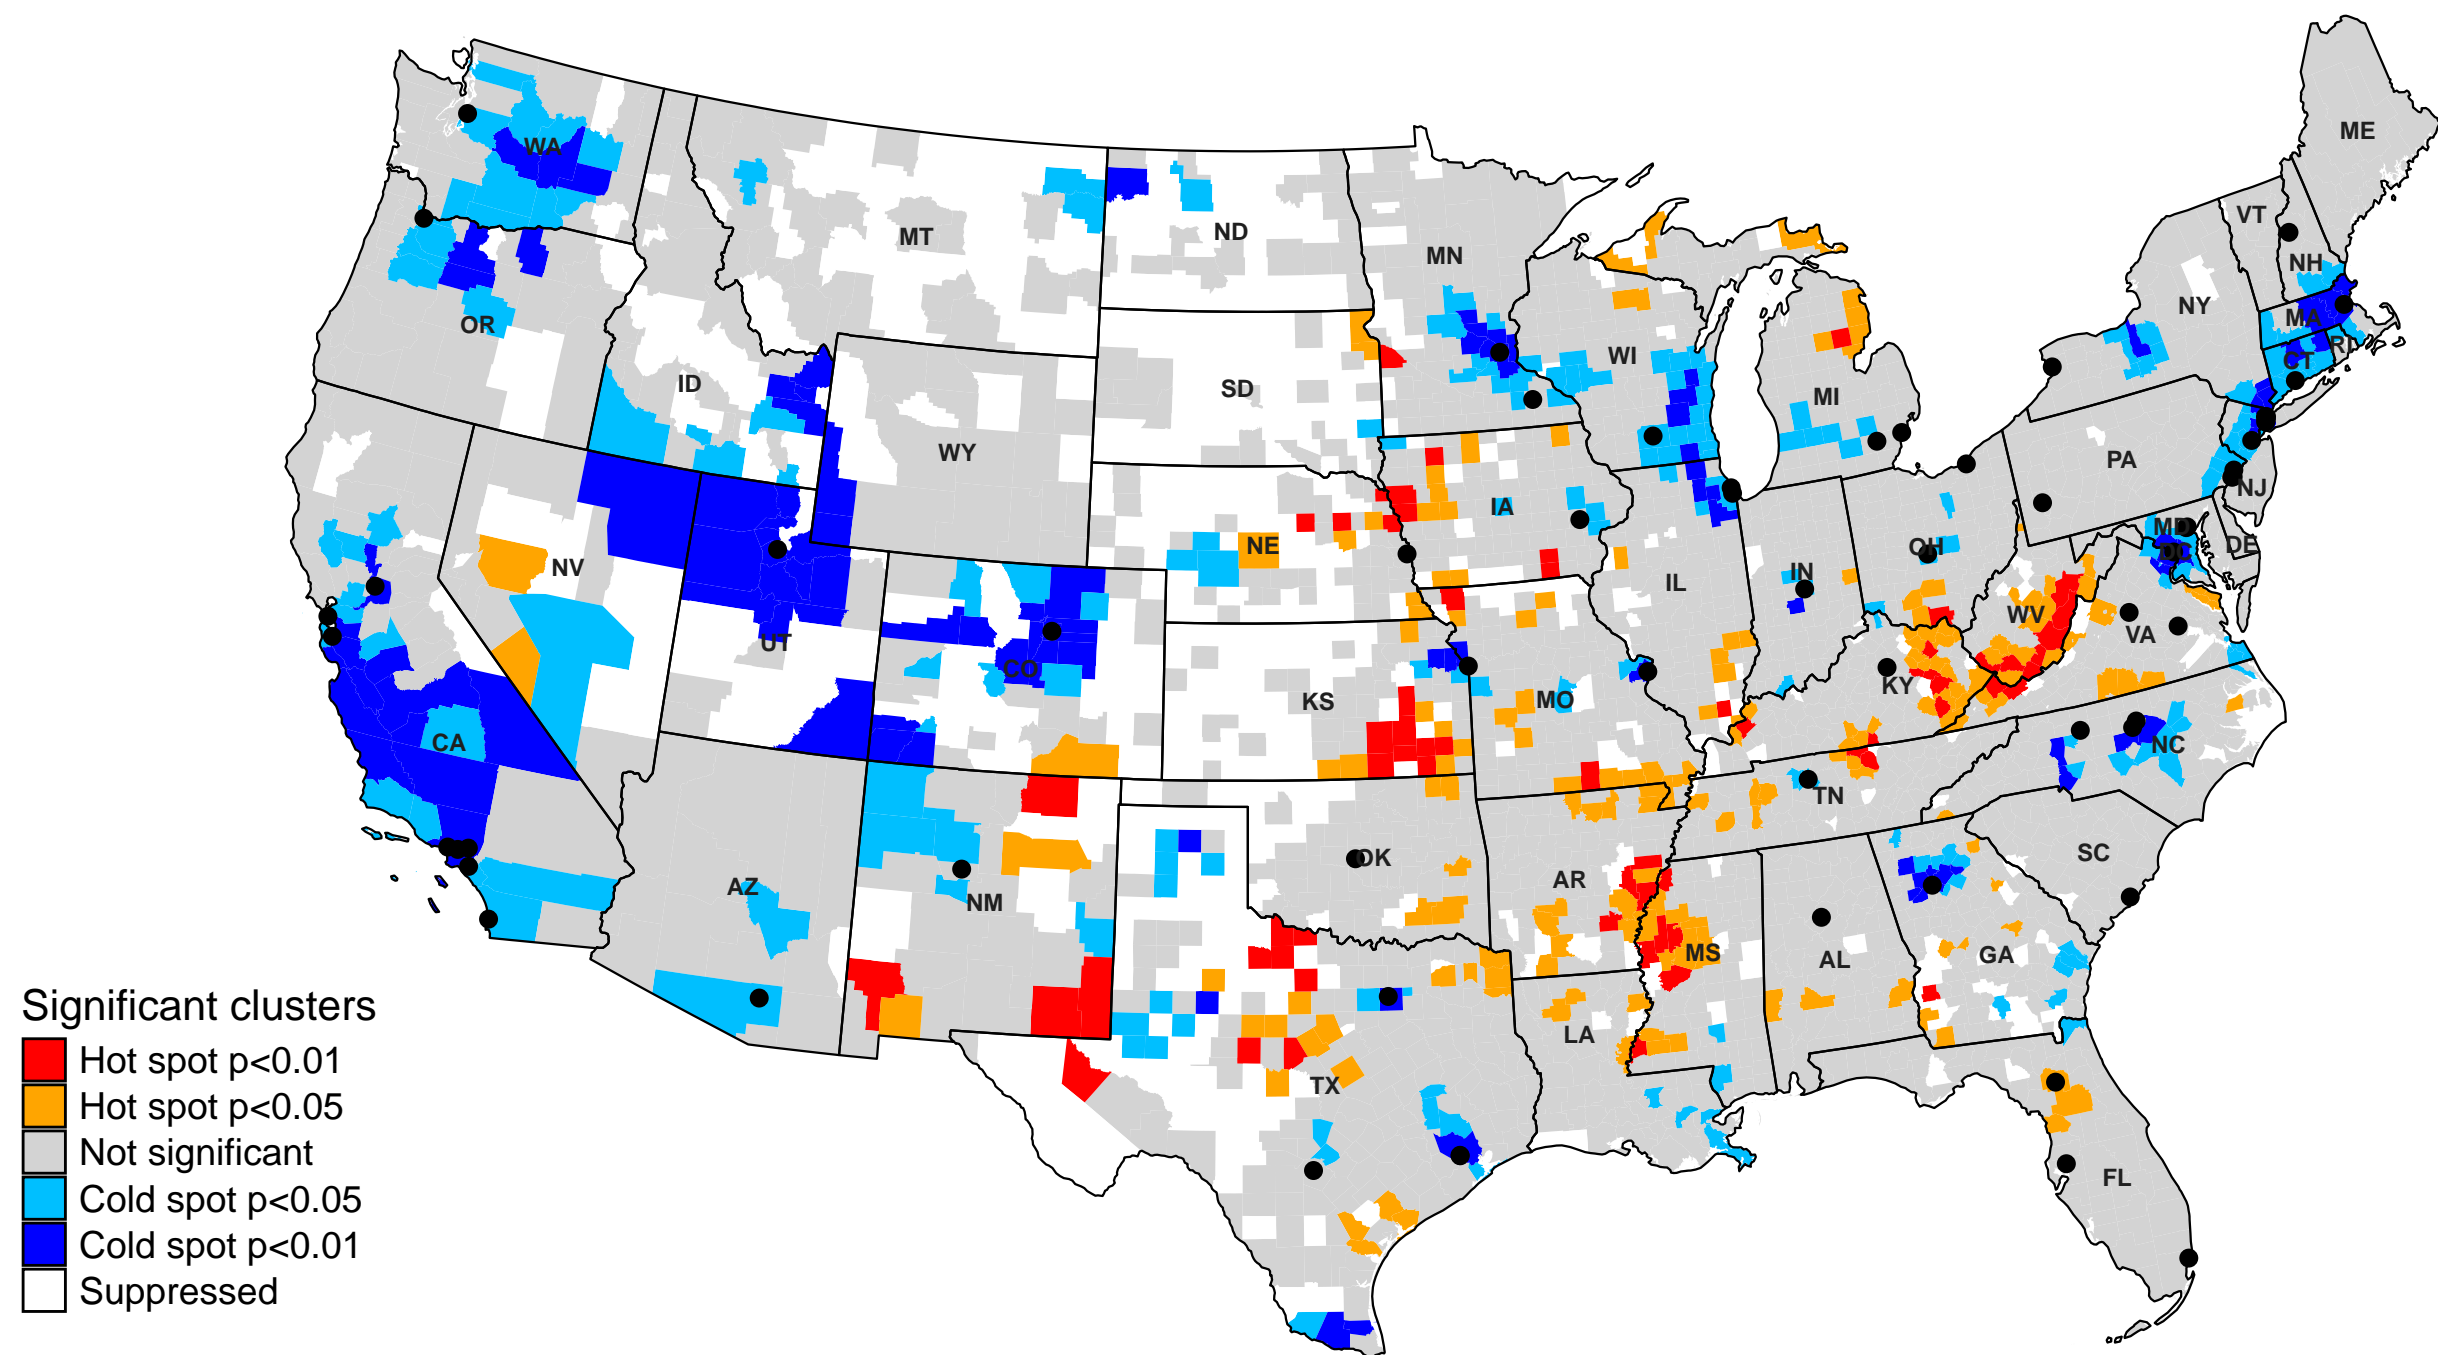

Figure S1. Hotspots of major cancer mortality rates in the US, 2018–2022. The hotspots were identified via Getis-Ord G_i^* statistics and permutation tested for statistical significance. This is the high-resolution version of Figure 1. The black dots represent the NCI cancer centers from NCI (<https://gis.cancer.gov/ncicatchment/>).
